Introduction

A significant tool for the dissemination of the project results was the active participation of the partners to specialized events, conferences and meetings in order to sensitize the target groups for the RespiceSME's methodologies and tools relevant for cluster managers, but also to recruit Photonics SMEs. In accordance with the dissemination plan, (cf. D4.1 + 4.2 + 4.3) the partners attended several events in their respective regions/countries.

In order to extract the metrics and the lessons learned, the consortium developed a template for the report of activities carried out during the events. Thus, the partners used this template to report their attendance to events.

The following section gathered reports from all partners for the overall project period (M01-M24).
